***ARTIFICIAL INTELLIGENCE, SUSTAINABLE COMMERCE AND
RESPONSIBLE MANAGEMENT: SHAPING A GREENER ECONOMY***

(SATURDAY, 26TH SEPTEMBER, 2026)

About The College

Established in **1999**, **Adv. V. B. Deshpande College of Commerce (Night)** was founded with a distinctive vision—to make quality commerce education accessible to **working students** and provide them with an opportunity to pursue higher education without compromising their professional commitments. Over the years, the College has remained steadfast in its mission of empowering students through **education, encouragement and equal opportunities**.

The College believes that education extends beyond the classroom. Students are therefore actively encouraged to participate in **curricular, co-curricular and extracurricular activities**, both within the institution and at intercollegiate platforms. These experiences nurture confidence, creativity, leadership, teamwork and a strong sense of social responsibility.

With a **socially committed and ethically grounded management**, the College has fostered a positive, inclusive and academically enriching environment where students are motivated to realise their potential. Special emphasis is placed on empowering students, particularly those who seek education alongside work, enabling them to enhance their qualifications, become **self-reliant and professionally competent**, and contribute meaningfully to society.

The College has been **accredited by NAAC with a “B” Grade and a CGPA of 2.35 in its First Cycle of Assessment**, reflecting its continued commitment to academic quality and holistic student development.

About The Conference

The International Conference on **“Artificial Intelligence, Sustainable Commerce and Responsible Management: Shaping a Greener Economy”** aims to provide a dynamic academic platform for researchers, academicians, industry professionals, policymakers and students to deliberate on emerging approaches to sustainable and responsible economic development. The rapid advancement of Artificial Intelligence (AI) is transforming business processes, decision-making, consumer behaviour and commercial practices. At the same time, growing environmental concerns necessitate a shift towards sustainable commerce, responsible production and ethical management.

The conference seeks to explore how AI and digital technologies can contribute to resource efficiency, green innovation, circular economy practices, sustainable supply chains and responsible business models. It will also examine the ethical, social and governance dimensions of AI, including data responsibility, transparency, inclusivity and accountability. The conference encourages interdisciplinary research and knowledge sharing on strategies that balance **economic growth, technological advancement, social well-being and environmental sustainability**. It will provide an opportunity to present innovative ideas, research findings, policy perspectives and practical solutions for building a resilient, inclusive and greener economy aligned with the broader vision of sustainable development and responsible management.
